Food Technology: Bread Making

Dear Parents,

This half term Year 6's food technology project is to design and make bread. After investigating different types of bread through texture, appearance and taste and also carrying out surveys at home, they are now putting some ideas together for their bread flavours and designs.

The children will be baking bread next Thursday (6th July) and for this, they will **only** need to provide the ingredients they are adding to their bread (Please remember we are a nut-free school). The basic bread ingredients will be provided.

If you have any concerns, please do not hesitate to contact me via school office or your child's homework diary. I will do my best to ensure that all products are allergy safe.

Thank you for your continued support; it is much appreciated.

Yours sincerely

Mrs King
